伸缩撑
Releasable Stay Hinge

- 1、伸缩撑安装在不同位置时,悬窗开启距离是不一样的。按我国门窗标准,悬窗开启距离应控制在300mm以内,所以应在安装时尽量靠近下侧位置为宜。(如下图) 注:安装后卡槽旋钮朝上。
- 1. When the releasable stay hinge is installed in different positions, the opening distance of the window is different. According to China standards, the opening distance of window should be controlled within 300mm, so it should be as close as possible to the lower side during installation. (As shown in the figure below) Note: The knob of the slot faces upward after installation.
- 2、关于伸缩撑使用方法:伸缩撑固定好后,先把窗扇向外推,当推到最大位置后,然后再往回拉,这时会有一声“喀”的声音,表明已经锁止。在关闭窗扇时,先将窗扇向外推,脱离锁止位置后,再向关闭方向拉窗扇,直至窗扇关闭。
- 2. Instruction for use of releasable stay hinge : after the releasable stay hinge is fixed, push the window sash outward first. When it is pushed to the maximum position, then pull it back. There will be a "click" sound at this time, indicating that it has been locked. When closing the window sash, first push the window sash outward. And then pull the window sash in the closing direction until the window sash is closed.
- 3、关于伸缩撑卡位片使用方法:当室外基本没有风压危险时,可以使用卡位片。在将伸缩撑推到开启位置后,可以用手动方法将卡位片推到沟槽中,防止伸缩撑突然弹回,可以说卡位片是一个保险装置。由于伸缩撑本身已经是锁定式撑挡,所以卡位片只是一个辅助装置。卡位片使用方法如右图。
- 3. Instruction for use of releasable stay hinge : When there is no risk of wind pressure outside, you can use the lock. After pushing the releasable stay hinge to the open position, you can manually push the locking piece into the groove to prevent it rebounding suddenly. It can be said that the locking piece is a safety device. Since the releasable stay hinge itself is already a locking brace, the clamping piece is just an auxiliary device. How to use the device as shown on the right.

- ★ 限位撑是专门设计来限制顶悬窗打开的角度。
- ★ 限位窗撑使用时,可在顶悬窗上使用限制其打开的宽度,其作用可: 1) 防止大风损坏窗户; 2) 防止儿童从窗隙坠下。
- ★ 选用最优良的 (304) 不锈钢制造。
- ★ Restrictor stay hinge is specially designed to limit the opening angle of the window.
- ★ When the restrictor stay hinge is used, it can be used on the overhang window to limit its opening width. Its functions can be: 1) Prevent the windows from being damaged by strong winds; 2) Prevent children from falling through window gaps.
- ★ Made of high quality (304) stainless steels.
